

**4 Courses**

**Introduction to Artificial Intelligence (AI)**

**Generative AI: Introduction and Applications**

**Generative AI: Prompt Engineering Basics**

**Building AI Powered Chatbots Without Programming**

Jun 8, 2025

## Diya Stanly

has successfully completed the online, non-credit Specialization

# AI Foundations for Everyone

In this specialization learners have developed foundational skills in AI. Learners who have successfully completed this specialization should be able to describe what is AI, its applications and use cases. They should be acquainted with terms like Machine Learning, Deep Learning, etc. The learners should be familiar with the various IBM Watson AI services that enable businesses to apply pre-built AI smarts to their solutions. They should also have knowledge on how to build and deploy web-based intelligent virtual assistants. Learners who have earned this certificate have completed 3 online courses on AI and have demonstrated their competency in Foundations of AI using quizzes and several hands on exercises, including creating and deploying an AI enabled chatbot on a website.

Rav Ahuja
Global Program Director,
Skills Network

Antonio Cangiano
Engineering Manager and AI Specialist
IBM Digital Business Group

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
